Scheduled Maintenance Inspections Save You Money. Ask Us How!

Why Schedule Maintenance Inspections?

Expensive Repairs

Most pressure washers and steam cleaners are operated and not checked or repaired unless they break down.

Safety Concerns

Units are operated with marginal hoses, safety valves and pressure unloaders that often are not working properly which could cause safety hazards.

Increased Costs

Your machine will slowly decrease in pressure during regular operation due to the coil being clogged with lime, the unloader sticking and/or poor pump packings.

Note:

If your coil plugs with lime, it will have to be replaced. Replacement costs range from \$1,000 to \$5,000.

Protect Your Investment

Regular maintenance inspections ensure your equipment is in optimum condition, increasing the longevity of your machine.

Terms

This is not a contract, it is an agreement. It can be canceled at anytime by either party, without penalty.

What We Will Do For You

Your machine is checked and tested with a pressure gauge to ensure all systems are working satisfactory.

Our experienced mechanics will perform a 50-point inspection and recommend any repairs that are needed.

Most repairs can be performed immediately, ensuring your equipment is in peak running condition.

Scheduled Maintenance Inspection Checklist

We Guarantee a 50-point Inspection with Every Call!

Included with each inspection:

- Change Pump Oil • Tighten Belts
• Remove and Replace Micro Switch • Remove and Replace Standard Spray Nozzle

Inspection of Unit: ✓ - Satisfactory B - Needs Immediate Attention C - Not Applicable

Hotsy Model # Serial # Built Code

- Pump: Oil Leaks, Oil Level, Unloader, Relief Valve, Valves & Seals, Suction Screen, Filter, Hose, Clamp, Belt, Alignment, Guards
Coil: Scale, Soot, Leaks
Engine: Oil Level, Oil Filter, Fuel Filter, Air Filter, Leaks, Fuel Tank, Fuse, Spark Plugs, Battery
Burner Assembly: Burner Nozzle, Electrodes, Transformer, Fuel Pressure, Clean & Check Fuel Filter
Electrical: GFI, Amp Draw, Pressure Switch, Flow Switch, Thermostat, Remote Shut Down Timer
Natural Gas: Gas Valve Operation, Clean Burning, Ignition
Leaks or Damage: Guns, Hose, Quick Coupler, Reel, Nozzle, Soap Feed, Solenoid, Hydrominder, Water Softener

To start your Scheduled Maintenance Program, call your local branch (numbers listed below).

We propose to provide scheduled maintenance services for your equipment at scheduled intervals agreed to below:

1. Fees include replacing a standard spray nozzle, replacing the micro switch, changing out the pump oil, adjusting all belts and all grease required. All additional lubricants, fluids, filter cartridges, parts and materials required will be billed out at prevailing prices.
2. Additional maintenance service is scheduled or performed only upon authorization. Additional labor, travel and parts required will be billed at prevailing prices. Scheduled maintenance rate includes travel time and machine inspection.
3. The machine must be available promptly for servicing upon arrival of mechanic at location or an additional labor charge will be made for waiting time. A suitable place must be provided to permit the mechanic to work on machines unrestricted by space limitations and other interferences.
4. The equipment to be serviced under this agreement is listed below. Additions and deletions will be made to the agreement as required and agreed to by both parties.
5. **This is not a contract, it is an agreement. It can be canceled at anytime by either party, without penalty.**

Pressure Washers

www.HotsyAB.com

Hotsy Operation Procedures

Before starting, squeeze trigger gun to relieve any pressure on system.

Turn PUMP ON switch to start pressure washer.

Turn HEAT ON switch to activate heater.

Turn SOAP ON switch to activate detergent. The soap will take a few moments to make it from the washer to the gun.

When finished washing, turn SOAP OFF to close soap solenoid. Do not shut down pressure washer until soap has been cleared from the lines.

When you turn off the soap, there will be a minute or two of soap in the lines.

Turn HEAT OFF switch. Allow 2 minutes of running with the heat off to cool down the coil and reduce scale build up in the system.

Turn PUMP OFF switch to turn off pressure washer.

Pull trigger gun to relieve system pressure and prior to reeling up the hose.

If you leave the soap or burner switch on at one remote box and there are multiple remote boxes on one machine, the other operator will not have control over these functions. **TURN ALL SWITCHES OFF WHEN FINISHED.**
